

Edrs 601: Educational Statistics I

Leadership & Counselor Education

The purpose of this course is to serve as an overview of introductory statistical methods, including descriptive and inferential statistical techniques. Although material will be presented from conceptual as well as procedural standpoints, this course emphasizes the acquisition of analytical problem-solving skills. Examples will be drawn from several academic disciplines with a particular emphasis on their application in educational settings.

3 Credits

Prerequisites

- Pre-Requisite: Graduate Education Majors
