

# BME 301: Bioinstrumentation Biomedical Engineering

Design and application of biomedical instrumentation. Topics include physiological measurements, biomedical measurements, electrodes, sensors, amplifiers, and imaging systems. Electrical safety in medical environments is also covered. 3 Credits

## **Prerequisites**

- Engr 360: Electric Circuit Theory (Minimum grade: C)
- Csci 251: Programming for Engineering and Sciences (Minimum grade: C)

## Instruction Type(s)

• Lecture: Lecture for BME 301

#### Course Fee(s) **Biomedical 1**

• \$100.00

#### Subject Areas

• Bioengineering and Biomedical Engineering
