

# Ch E 520: Biochemical Engineering

An overview of microbiology and biochemistry. The development of models for microbial kinetics. The design of reactors and auxiliary equipment for microbial systems.

3 Credits

### **Cross-listed Courses**

• BME 520: Biochemical Process Engineering

## Instruction Type(s)

• Lecture: Lecture for Ch E 520

## **Subject Areas**

• Chemical Engineering

#### **Related Areas**

• Chemical and Biomolecular Engineering
