

## Ch E 550: Membrane Science and Engineering

### Chemical Engineering

This course covers the science of membrane processes and the engineering of membrane system module and process design. Topics discussed include: membrane transport theory, porous and nonporous membranes, membrane characterization, and unit operations with a focus on the application of membrane theory to unit operations and the optimization of both industrial and academic applications.

3 Credits

### Prerequisites

- [Engr 322: Transport Phenomena](#)

### Instruction Type(s)

- Lecture: Lecture for Ch E 550

### Subject Areas

- [Chemical Engineering](#)

### Related Areas

- [Chemical and Biomolecular Engineering](#)
