

Math 269: Introduction to Linear Programming

Selected topics in quantitative methods with an emphasis on business applications. Topics include Gauss-Jordan elimination, simplex solutions for linear programming models and transportation and assignment algorithms.

Prerequisites

- Math 261 or Math 267 or Math 271 (each with minimum grade of C)
- · Accountancy Majors Only

Instruction Type(s)

- Lecture: Lecture for Math 269
- Lecture: Web-based Lecture for Math 269

Subject Areas

• Mathematics, General

Related Areas

- Algebra and Number Theory
- Analysis and Functional Analysis
- Geometry/Geometric Analysis
- Topology and Foundations
