

# **BME 524: Microscopy for Engineers Biomedical Engineering**

Comprehensive study of the principles of optical microscopy and imaging techniques commonly used in engineering research, with an emphasis on biological, biomedical, and chemical engineering fields.

## Prerequisites

• Pre-Requisite Phys 212 OR Graduate Standing

#### **Cross-listed Courses**

• Ch E 524: Microscopy for Engineers

### **Instruction Type(s)**

• Lecture: Lecture for BME 524

#### **Subject Areas**

Bioengineering and Biomedical Engineering
