

## Csci 575: Database Systems Computer & Information Science

Review of database systems with special emphasis on data description and manipulation languages; data normalization; functional dependencies; database design; data integrity and security; distributed data processing; design and implementation of a comprehensive project.

## **Prerequisites**

• Pre-requisite: CSCI 423 or CSCI 475 or CSCI 501 or Graduate Standing

## **Instruction Type(s)**

• Lecture: Lecture for Csci 575

## **Subject Areas**

• Computer Science
