

# Ch E 543: Introduction to Polymer Science Chemical Engineering

This course is designed as an upper-level undergraduate and introductory graduate-level elective to teach the fundamentals in polymer chemistry and physics, structure/property relationships, and characterization. The course is taught at an introductory level aimed at students with a background in chemistry (especially organic chemistry).

3 Credits

### **Prerequisites**

- Chem 221: Elementary Organic Chemistry I
- Instructor approval or graduate standing.

## Instruction Type(s)

• Lecture: Lecture for Ch E 543

## **Subject Areas**

• Chemical Engineering

### **Related Areas**

about the accreditation.

• Chemical and Biomolecular Engineering
