

## Engr 672: Viscoelasticity

### [School of Engineering](#)

Integral and differential operator forms of constitutive relationships, relaxation and creep characteristics, integran and Fourier transform methods. Laplace transform methods and approximate inversion techniques. Dynamic response problems and temperature-dependent effects. Nonlinear behavior characterization.

3 Credits

### Prerequisites

- [Engr 617: Continuum Mechanics](#)

### Instruction Type(s)

- Lecture: Lecture for Engr 672

### Subject Areas

- [Engineering, General](#)
- [Mechanical Engineering](#)
- [Civil Engineering, General](#)
