

## **AT 606: Orthopedic Eval of Athletic Injuries II**

### **School of Applied Sciences**

This combined lecture/laboratory course serves as a continuation of AT 603: Orthopedic Evaluation of Athletic Injuries I and provides students with the necessary skills for competent examination and clinical diagnosis of athletic injuries. Applied anatomy of orthopedic structures in the body will be emphasized and will provide a foundation for examination. Students will gain knowledge and functional ability in gathering information through patient history, observation, palpation, assessment of range of motion and muscle function, and associated special tests.
