

Ch E 528: Polymer Processing

Chemical Engineering

Analytical non-Newtonian fluid mechanical approach to polymer processing techniques; calendars, screw pumps, extruders, mixing, injection molding, and bonding operations.

3 Credits

Prerequisites

- Co-requisite: Engr 322 or Engr 323 or Graduate Standing.

Instruction Type(s)

- Lecture: Lecture for Ch E 528

Subject Areas

- [Polymer/Plastics Engineering](#)
- [Chemical Engineering](#)
- [Computer Engineering, General](#)
