

# Csci 353: Introduction to Numerical Methods

## Computer & Information Science

Numerical solution of problems; problem analysis, algorithm design, coding, testing, interpretation of results; use of software packages on mainframe computers.

3 Credits

### Prerequisites

- [Math 263: Unified Calculus & Analytic Geometry III](#)
- Pre-Requisite: 24 Earned Hours
- Csci 111 or Csci 251

### Instruction Type(s)

- Lecture: Lecture for Csci 353

### Subject Areas

- [Computer Science](#)
