

# Ch E 316: Chemical Engineering Fluid Mechanics

This class discusses fluid mechanics principles applicable to chemical engineering practice, focused on the development of transport balances around control volumes. Course concepts center around mass, energy, and momentum balance principles for incompressible and compressible fluids.

3 Credits

#### Prerequisites

• Math 262: Unified Calculus & Analytic Geometry II (Minimum grade: C-)

## **One-way corequisites**

Engr 321: Thermodynamics

# Instruction Type(s)

• Lecture: Lecture for Ch E 316

### Subject Areas

Engineering, General

The University of Mississippi is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award certificates and baccalaureate, master's, specialist, and doctoral degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097, call 404-679-4500, or visit online at www.sacscoc.org for questions about the accreditation.
