

Phcy 422: Pharmaceutics and Calculations II School of Pharmacy

This course provides an understanding of various dosage forms and drug delivery systems and how medicinal and pharmaceutical active ingredients are incorporated into them. It also introduces pharmaceutical calculations encountered in the contemporary practice of pharmacy. The dispensing and extemporaneous compounding of pharmaceutical active agents are discussed and practiced in the skills lab. This course is providing continuous development of pharmacy practice skills, emphasizing active learning for integration and application of curricular content and incremental development of professional and general abilities.
