

Engr 618: Vadose Zone Hydrology School of Engineering

Theory and application of physical properties and processes governing transport of mass and energy in unsaturated geologic media. Primary attention given to occurrence and movement of water in vadose-zone soil environments; secondary attention given to transport of soil gas and heat. Experimental methods and analytical and numerical models are introduced.

3 Credits

One-way corequisites

Math 353: Elementary Differential Equations

Instruction Type(s)

Lecture: Lecture for Engr 618

Subject Areas

Hydrology and Water Resources Science
