

BME 520: Biochemical Process Engineering Biomedical Engineering

Application of cellular and molecular biology to process engineering to describe the manufacture of products derived from cell cultures. Emphasis is placed on enzyme kinetics and technology; bioreaction kinetics; design, analysis, and control of bioreactors and fermenters; and downstream processing of bioreaction products.

3 Credits

Prerequisites

• Junior Standing Required

Cross-listed Courses

• Ch E 520: Biochemical Engineering

Subject Areas

• Bioengineering and Biomedical Engineering
