

## **Csci 547: Digital Image Processing**

### **Computer & Information Science**

Present mathematical models for image formation. Introduce statistical, geometric, and inferential methods to extract information from single and multiple images. Discuss applications of computer vision.

3 Credits

### **Prerequisites**

- Pre-requisites: (Csci 211 and Math 262) OR (Csci 251 and Math 262) OR Graduate Standing

### **Instruction Type(s)**

- Lecture: Lecture for Csci 547

### **Subject Areas**

- [Web Page, Digital/Multimedia and Information Resources Design](#)
- [Computer and Information Sciences, General](#)
