

BME 461: Biomedical Engineering Senior Design I Biomedical Engineering

Biomedical-orientated design projects involving the design, planning, and testing of a prototype; and/or selection of new design projects addressing realistic constraints such as human safety, health care costs, reliability, ethics, and social impact. Part 1 of a two-semester sequence.

2 Credits

Prerequisites

BME 444: Biomedical ControlsPre-Requisite: 24 Earned Hours

Instruction Type(s)

• Lecture: Lecture for BME 461

Subject Areas

• Bioengineering and Biomedical Engineering
