

Engr 618: Vadose Zone Hydrology

[School of Engineering](#)

Theory and application of physical properties and processes governing transport of mass and energy in unsaturated geologic media. Primary attention given to occurrence and movement of water in vadose-zone soil environments; secondary attention given to transport of soil gas and heat. Experimental methods and analytical and numerical models are introduced.

3 Credits

One-way corequisites

- [Math 353: Elementary Differential Equations](#)

Instruction Type(s)

- Lecture: Lecture for Engr 618

Subject Areas

- [Hydrology and Water Resources Science](#)

Related Areas
