

Bisc 111: The Environment: Integrated Exploration

Biology

In this integrated lecture and laboratory course, students will explore the scientific process and its application to the study of the environment, including principles of evolution, the origin and diversity of life, ecological relationships in the natural world, and the impact of humans on the environment. The course format provides a unique learning experience that develops critical thinking skills students can apply to real world problems related to the environment. This course is intended for non-science majors, and applies to the science requirement of the core curriculum. The course will not count for credit if Bisc 104 and 105 or Bisc 162 and 163 are counted.

4 Credits

Instruction Type(s)

- Lecture/Lab: Lecture/Lab for Bisc 111

Subject Areas

- [Biology/Biological Sciences, General](#)

Related Areas
