

BME 333: Biological Transport Biomedical Engineering

Fundamentals and integration of fluid mechanics, heat transfer, and mass transfer in living systems. Basic concepts of transport phenomena are presented and applied to biological systems and to the design of medical devices.

3 Credits

Prerequisites

• Prerequisite: BME 305 or Ch E 308 or graduate standing

Instruction Type(s)

• Lecture: Lecture for BME 333

Subject Areas

• Bioengineering and Biomedical Engineering
