

# BME 370: Intro to Bioinformatics & Biostatistics Biomedical Engineering

Principles of bioinformatics analysis applied to translational biomedical studies. Application topics include genomic data analysis, biomarker development, statistical modeling, machine learning, and clinical trial design.

3 Credits

## **Prerequisites**

- Math 353: Elementary Differential Equations
- Csci 256: Programming in Python

## Instruction Type(s)

• Lecture: Lecture for BME 370

#### **Subject Areas**

• Biomathematics, Bioinformatics, and Computational Biology, Other

#### **Related Areas**

- Bioinformatics
- Biometry/Biometrics
- Biostatistics
