

Csci 556: Multiparadigm Programming

[Computer & Information Science](#)

Principles and practices of software design and programming using languages that feature explicit and convenient support for multiple programming paradigms (e.g., imperative, object-oriented, and functional).

3 Credits

Prerequisites

- Prerequisite: (Csci 211 or CIS 211) and Csci 223 or graduate standing

Instruction Type(s)

- Lecture: Lecture for Csci 556

Subject Areas

- [Computer Science](#)
