

# AT 603: Orthopedic Eval of Athletic Injuries I

## [School of Applied Sciences](#)

This combined lecture/laboratory course serves to provide students with the necessary skills for competent examination and clinical diagnosis of athletic injuries. Applied anatomy of orthopedic structures in the body will be emphasized and will provide a foundation for examination. Students will gain knowledge and functional ability in gathering information through patient history, observation, palpation, assessment of range of motion and muscle function, and associated special tests.

3 Credits
