

## **BME 520: Biochemical Process Engineering Biomedical Engineering**

Application of cellular and molecular biology to process engineering to describe the manufacture of products derived from cell cultures. Emphasis is placed on enzyme kinetics and technology; bioreaction kinetics; design, analysis, and control of bioreactors and fermenters; and downstream processing of bioreaction products.

3 Credits

## **Prerequisites**

• Prerequisite: BME 305 or Ch E 308 or graduate standing

## **Cross-listed Courses**

• Ch E 520: Biochemical Engineering

## **Subject Areas**

• Bioengineering and Biomedical Engineering
