

# **Engr 545: Polymer Nanocomposites Chemical Engineering**

This course is designed as an introductory graduate-level course covering topics related to the design, synthesis, fabrication, testing, and characterization of polymer nanocomposites (PNCs). Different applications of PNCs are also discussed.

## **Prerequisites**

• Chem 105: General Chemistry I (Minimum grade: C-)

## **Instruction Type(s)**

• Lecture: Lecture for Engr 545

#### **Subject Areas**

• Chemical Engineering

#### **Related Areas**

• Chemical and Biomolecular Engineering
