

Engr 609: Time Series Analysis

[School of Engineering](#)

Study of random processes and methods for analyzing random signals. Topics include stationarity, ergodicity, correlation, coherence, continuous and digital spectral analysis, data sampling considerations, and filtering.

3 Credits

Instruction Type(s)

- Lecture: Lecture for Engr 609

Subject Areas

- [Engineering, General](#)
- [Electrical and Electronics Engineering](#)
- [Computer Science](#)
