

PH 317: Public Health Study Abroad

Students will participate in an immersive, field-based study abroad program focusing on public health outside of the United States. Through guest lectures and speakers, site visits, excursions, and cultural activities, this program will help students gain knowledge and skills related to global health. This program is suitable for students with an interest in topics including public health, health care, sustainability, education, nutrition, community development, equity, and a multitude of other areas.
