

## **Anth 356: Ancient Health & Disease-Paleopathology**

### **Sociology & Anthropology**

Students will study the natural history of infectious pathogens, their origins, their impact on human history; how health and disease were impacted by world events such as the rise of agriculture, urbanization, empire building, and globalization; and learn how to read archaeological skeletons to distinguish among infectious diseases, trauma patterns, human activity patterns, and debilitating diseases in order to reconstruct the lives of past populations.
