

BMS 661: Cannabis Identification, Genomics, & Eng Biomolecular Sciences

BMS 661 is an asynchronous online course where students will gain a foundational knowledge of cannabis botany from distinguishing features to growing cycles. Students will learn the pros and cons of techniques employed in industry to make informed decisions within their future workplaces. We will introduce and cover genomics and engineering at a base level with the opportunity to dive further. By the end of the course, students will be able to propose a controlled cultivation experiment to manipulate cannabis genetics.

3 Credits

Instruction Type(s)

- Lecture: Web-based Lecture for BMS 661
- Lecture: Online Program for BMS 661

Subject Areas

Botany/Plant Biology

Related Areas

- Botany/Plant Biology, Other
- Plant Physiology

The University of Mississippi is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award certificates and baccalaureate, master's, specialist, and doctoral degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097, call 404-679-4500, or visit online at www.sacscoc.org for questions about the accreditation.
