

## Phys 634: Electronics in Research

This laboratory course covers tools and techniques associated with the collection and interpretation of data used in experimental physics. The specific set of topics may vary depending on the research projects the students in the class are involved in, but it will include transducers, signal conditioning, noise and power management, data acquisition, and testing equipment. In addition, the course will also introduce students to using programmable devices to help facilitate specialized applications on an as-needed basis.

3 Credits

## Instruction Type(s)

• Lab: Laboratory for Phys 634

## Subject Areas

- <u>Physics, General</u>
- <u>i nysics, Ocherai</u>

## **Related Areas**

- <u>Acoustics</u>
- <u>Atomic/Molecular Physics</u>
- <u>Condensed Matter and Materials Physics</u>
- <u>Elementary Particle Physics</u>
- <u>Nuclear Physics</u>
- Optics/Optical Sciences
- Physics, Other
- <u>Theoretical and Mathematical Physics</u>

The University of Mississippi is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award certificates and baccalaureate, master's, specialist, and doctoral degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097, call 404-679-4500, or visit online at www.sacscoc.org for questions about the accreditation.
