

Math 380: Statistical Computing and Data Analysis

Mathematics

This course is an introduction to statistical computing and data analysis in R or SAS. Topics include basic programming, simulation and bootstrap sampling, exploratory data analysis, statistical graphics, simple linear and multiple linear regression modeling, logistic regression and classification, linear discriminant analysis and clustering. Real data applications are emphasized in this course.

3 Credits

Prerequisites

- [Math 375: Introduction to Statistics I](#) (Minimum grade: C)
- Pre-Requisite: 24 Earned Hours

Instruction Type(s)

- Lecture: Lecture for Math 380

Subject Areas

- [Statistics, General](#)

Related Areas

- [Mathematical Statistics and Probability](#)
