

Bisc 590: Systems Biology: Theory and Practice

This course covers basic principles of systems biology (e.g., mass spectrometry, proteomics, and metabolomics), multi-omics integration and molecular networks, as well as the applications in solving real-life research problems.

Prerequisites

- Chem 471: Biochemistry I
- Senior standing required.

Instruction Type(s)

• Lecture/Lab: Lecture/Lab for Bisc 590

Subject Areas

- Structural Biology
- <u>Biotechnology</u>
- Cell/Cellular and Molecular Biology
