

BMS 452: Directed Research Studies in BMS II

Biomolecular Sciences

This course provides an opportunity for students to engage in independent research under the mentorship of a faculty member in the Department of BioMolecular Sciences. This is the second course in a three-part series. Throughout the directed studies series, students will design, conduct, and analyze a research project within a specific area of interest, guided by their faculty mentor. Activities within these courses will be aimed at developing scientific research skills, which include, but are not limited to, literature review, data collection, analysis, and academic writing.
