

Ph.D in Mathematics

The Ph.D. in mathematics requires mastery of a broad area of mathematics and completion of a dissertation that is an original and substantial contribution. This terminal degree prepares a student for a professional career in mathematics, as a teacher or a research mathematician.

Minimum Total Credit Hours: 57 Course Requirements

A student must complete a minimum of 39 course hours of graduate work, exclusive of the dissertation (18 hours) and any thesis hours (Math 697). This must include the sequences Modern Algebra (Math 625, 626); Theory of Functions of Real Variables (Math 753, 754); Theory of Functions of Complex Variables (Math 655, 656); and General Topology (Math 501). Of the 39 course hours, 30 must be in courses open only to graduate students.

Other Academic Requirements

An advisory committee consisting of five members of the graduate faculty will be appointed for each graduate student who declares his or her intention to become a candidate for the degree. Written exams will be administered covering Real Analysis, Algebra, and one other approved sequence. In addition, the candidate must satisfy the advisory committee as to the extent of the candidate's research ability and activity, as well as the suitability and excellence of coursework presented.

The University of Mississippi is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award certificates and baccalaureate, master's, specialist and doctoral degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097, call 404-679-4500, or visit online at www.sacscoc.org for questions about the accreditation.
