

BMS 475: Molecular Basis of Future Medicines Biomolecular Sciences

This course is designed to familiarize students with both the molecular basis and the future directions of drug development. A key focus of the course will be the foreseeable global health challenges that might be (or might not be) addressed by new pharmaceuticals. Central to this will be thinking about how the chemistry underlying drug development might change in the face of new approaches, such as personalized medicine and advanced gene sequencing, and new needs, such as an aging society and emerging diseases (as exemplified by the COVID-19 pandemic).

2 Credits

Prerequisites

• Pre-requisite: Pharmacy P2 or P3

Instruction Type(s)

• Lecture: Lecture for BMS 475

Subject Areas

• Pharmacy (PharmD - USA - PharmD, BS/BPharm - Canada)

Related Areas

- <u>Clinical and Industrial Drug Development (MS, PhD)</u>
- Industrial and Physical Pharmacy and Cosmetic Sciences (MS, PhD)
- Medicinal and Pharmaceutical Chemistry
- <u>Natural Products Chemistry and Pharmacognosy (MS, PhD)</u>
- <u>Pharmaceutical Marketing and Management</u>
- Pharmaceutical Sciences
- <u>Pharmaceutics and Drug Design (MS, PhD)</u>
- Pharmacoeconomics/Pharmaceutical Economics (MS, PhD)
- Pharmacy Administration and Pharmacy Policy and Regulatory Affairs (MS, PhD)
- Pharmacy, Pharmaceutical Sciences, and Administration, Other

The University of Mississippi is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award certificates and baccalaureate, master's, specialist, and doctoral degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097, call 404-679-4500, or visit online at www.sacscoc.org for questions about the accreditation.
