

BMS 665: Pharmacology & Toxicology of Cannabinoid

BMS 665 is an asynchronous online course focused on the pharmacology and toxicology of cannabinoids. Through the exploration of basic principles of pharmacokinetics and pharmacodynamics, students will gain a thorough understanding of how cannabinoids interact with the body. The course will then focus on honing skills to critically analyze reliable scientific literature along with exploring pertinent case studies. Students will develop the ability to make informed decisions regarding the use of cannabinoids, identifying potential adverse effects and evaluating drug interactions.

3 Credits

Instruction Type(s)

• Lecture: Web-based Lecture for BMS 665

Subject Areas

• <u>Pharmacology and Toxicology</u>

Related Areas

- Environmental Toxicology
- Pharmacology
- Pharmacology and Toxicology, Other
- <u>Toxicology</u>

The University of Mississippi is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award certificates and baccalaureate, master's, specialist and doctoral degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097, call 404-679-4500, or visit online at www.sacscoc.org for questions about the accreditation.
