

PH 600: Foundations of Public Health [Health, Exercise Sci & Recreation Mgmt](#)

This graduate-level course introduces students to public health concepts as well as public health professional practice. Students will examine the origins and development of the modern public health system and the relationship of public health to the overall health system. This course will broadly cover topics that students will explore in future advanced public health coursework, including epidemiology, global and environmental health, health policy and administration, and planning, implementing, and evaluating public health programs.

3 Credits
