Ch E 523: Molecular and Cellular Biophysics

Chemical Engineering

This course provides a molecular perspective on thermodynamics, transport phenomena, and reaction kinetics in a biological setting, critical for analyzing, understanding, and modeling life processes that initiate at the molecular level.

3 Credits

Prerequisites

- Pre-Requisite Phys 212 OR Graduate Standing

Cross-listed Courses

- BME 523: Molecular and Cellular Biophysics

Subject Areas

- Chemical Engineering

Related Areas

- Chemical and Biomolecular Engineering
