C E 421: Matrix Analysis of Structures

Civil Engineering

Virtual work and virtual displacement methods; introduction to the flexability and displacement matrix methods; stiffness matrices for rod, frame, and slab elements; introduction to structural dynamics and elastic stability; computational tools.

3 Credits

Prerequisites
- C E 311: Structural Analysis
- Pre-Requisite: 24 Earned Hours

Instruction Type(s)
- Lecture: Lecture for C E 421

Subject Areas
- Civil Engineering, General
- Structural Engineering

Related Areas
- Civil Engineering, Other
- Geotechnical and Geoenvironmental Engineering
- Transportation and Highway Engineering
- Water Resources Engineering
