C E 495: Geospatial Analysis for Engr & Vis Apps
Civil Engineering
Working knowledge, application development, and operation issues related to geographical information system (GIS) tools using modern remote sensing raster imagery and vector mapping data; geospatial workflow implementation for engineering and visualization applications; geographic and non-geographic data processing to create spatial maps, inventory and attribute database, and data visualization; import and export of engineering graphics data; development of GIS based decision support systems.

3 Credits

Prerequisites
● Senior standing required.

Instruction Type(s)
● Lecture: Lecture for C E 495

Course Fee(s)
Civil Engineering 4
● $150.00

Subject Areas
● Civil Engineering, General
● Transportation and Highway Engineering

Related Areas
● Geotechnical and Geoenvironmental Engineering
● Structural Engineering
● Water Resources Engineering
