Csci 356: Data Structures in Python

Computer & Information Science

This course will introduce data structures and their application using the Python programming language. Abstract data types for stack, queue, various lists, trees and graphs will be studied. Built-in data structures such as lists, dictionaries, and tuples will be used extensively.

3 Credits

Prerequisites
- Pre-Requisite: 24 Earned Hours
- Pre-requisite Csci 256 or Csci 112 minimum C-

Instruction Type(s)
- Lecture: Lecture for Csci 356
- Lecture: Web-based Lecture for Csci 356

Subject Areas
- Computer Science
