Csci 557: GPU Computing

Computer & Information Science

This course examines the use of GPU for general-purpose high performance parallel computing. It covers the key principles, practices, and hardware/software architectures for design of general-purpose, parallel programs using GPUs. The course surveys and analyzes real-world applications that benefit from GPUs, and involves hands-on programming as well as performance profiling and analysis. The fundamentals of concurrent programming and its challenges at algorithm and coding levels are also discussed.

3 Credits

**Prerequisites**

- Pre-requisite (Csci 211 and Csci 223) OR (El E 385 and Csci 356) OR Graduate Standing

**Instruction Type(s)**

- Lecture: Lecture for Csci 557

**Subject Areas**

- [Computer Science](https://catalog.olemiss.edu/2024/fall/undergraduate/engineering/computer-science/csci-557)
