El E 302: Applied Communication Systems  
Electrical and Computer Engineering  
Introduction to general communication principles and systems including transmission media, modulation, detection, and system applications. May not be counted toward a major in electrical engineering.  
3 Credits  
Prerequisites  
- El E 301: Applied Electronics  
Instruction Type(s)  
- Lecture: Lecture for El E 302  
Subject Areas  
- Electrical, Electronic and Communications Engineering Technology/Technician
