Engr 688: Current Issues in Telecommunications
School of Engineering
Survey of modern communication systems, practices, technology, business applications, and regulatory issues. Wireless systems, protocols, problems in propagation, spectral allocation, and modulation techniques. Asynchronous Transfer Mode and B-ISDN. Use of satellites for personal communications.
3 Credits
Prerequisites
- TC 501: Foundations of Communications (Minimum grade: C)
- EIE 534: Wireless Mobile Communications (Minimum grade: C)
Instruction Type(s)
- Lecture: Lecture for Engr 688
Subject Areas
- Engineering, General
- Electrical and Electronics Engineering
