

Math 721: Time Series and Data Analysis

This course covers time series analysis in time domain and frequency domain. Topics include ARIMA models, FARIMA models, GARCH models, nonstationary and seasonal time series models, and other time series models, spectral analysis, long memory time series, forecasting stationary time series, and multivariate time series. Statistics software will be used for data analysis.

3 Credits

Instruction Type(s)

Seminar: Seminar for Math 721

Subject Areas

• Mathematics, General

Related Areas

- <u>Algebra and Number Theory</u>
- Analysis and Functional Analysis
- <u>Geometry/Geometric Analysis</u>
- <u>Topology and Foundations</u>

The University of Mississippi is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award certificates and baccalaureate, master's, specialist, and doctoral degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097, call 404-679-4500, or visit online at www.sacscoc.org for questions about the accreditation.
