

BMS 665: Pharmacology & Toxicology of Cannabinoid

Biomolecular Sciences

BMS 665 is an asynchronous online course focused on the pharmacology and toxicology of cannabinoids. Through the exploration of basic principles of pharmacokinetics and pharmacodynamics, students will gain a thorough understanding of how cannabinoids interact with the body. The course will then focus on honing skills to critically analyze reliable scientific literature along with exploring pertinent case studies. Students will develop the ability to make informed decisions regarding the use of cannabinoids, identifying potential adverse effects and evaluating drug interactions.

3 Credits

Instruction Type(s)

- Lecture: Web-based Lecture for BMS 665

Subject Areas

- [Pharmacology and Toxicology](#)

Related Areas

- [Environmental Toxicology](#)
- [Pharmacology](#)
- [Pharmacology and Toxicology, Other](#)
- [Toxicology](#)
