

Bisc 110: Human Biology: An Integrated Exploration

Biology

In this integrated lecture and laboratory course, students will explore the scientific process and its application to the study of the human body, including cellular concepts, organ systems, homeostasis, and inheritance. The course format provides a unique learning experience that develops critical thinking skills students can apply to real world problems related to human biology. This course is intended for non- science majors, and applies to the science requirement of the core curriculum. The course will not count for credit if Bisc 102 and 103 or Bisc 160 and 161 are counted.

4 Credits

Instruction Type(s)

- Lecture/Lab: Lecture/Lab for Bisc 110

Subject Areas

- [Biology/Biological Sciences, General](#)

Related Areas

- [Biomedical Sciences, General](#)
