Astr 436: Introduction to Cosmology

Physics & Astronomy

This is an introductory course in modern cosmology, covering the observational evidence for the current standard model of cosmology and its modeling in terms of the theory of gravity and spacetime. Topics covered include the current status of observational cosmology, homogeneous and isotropic spacetime models and their evolution starting from the Big Bang, the cosmic microwave background, dark matter and dark energy, and structure formation in the universe.

3 Credits

Prerequisites
- Phys 317: Introduction to Modern Physics I
- Math 262: Unified Calculus & Analytic Geometry II
- Pre-Requisite: 24 Earned Hours

Cross-listed Courses
- Phys 436: Introduction to Cosmology

Subject Areas
- Theoretical and Mathematical Physics

Related Areas
- Acoustics
- Atomic/Molecular Physics
- Condensed Matter and Materials Physics
- Elementary Particle Physics
- Nuclear Physics
- Optics/Optical Sciences
- Physics, General
- Physics, Other

The University of Mississippi is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award certificates and baccalaureate, master’s, specialist, and doctoral degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097, call 404-679-4500, or visit online at www.sacscoc.org for questions about the accreditation.
