Phys 107: Conceptual Physics I

**Physics & Astronomy**

This course is an overview of physics and the physical universe presented primarily from a conceptual rather than mathematical perspective. It uses lectures, demonstrations, and laboratory exercises to illustrate applications of physics to everyday phenomena in an integrated lecture-laboratory format. This course covers mechanics, properties of matter, heat and sound. From among Phys 107, Phys 211 and Phys 213, only one can be counted towards a degree.
